

Media kit

All-in-one development platform for web3 games

Sequence media kit 2024

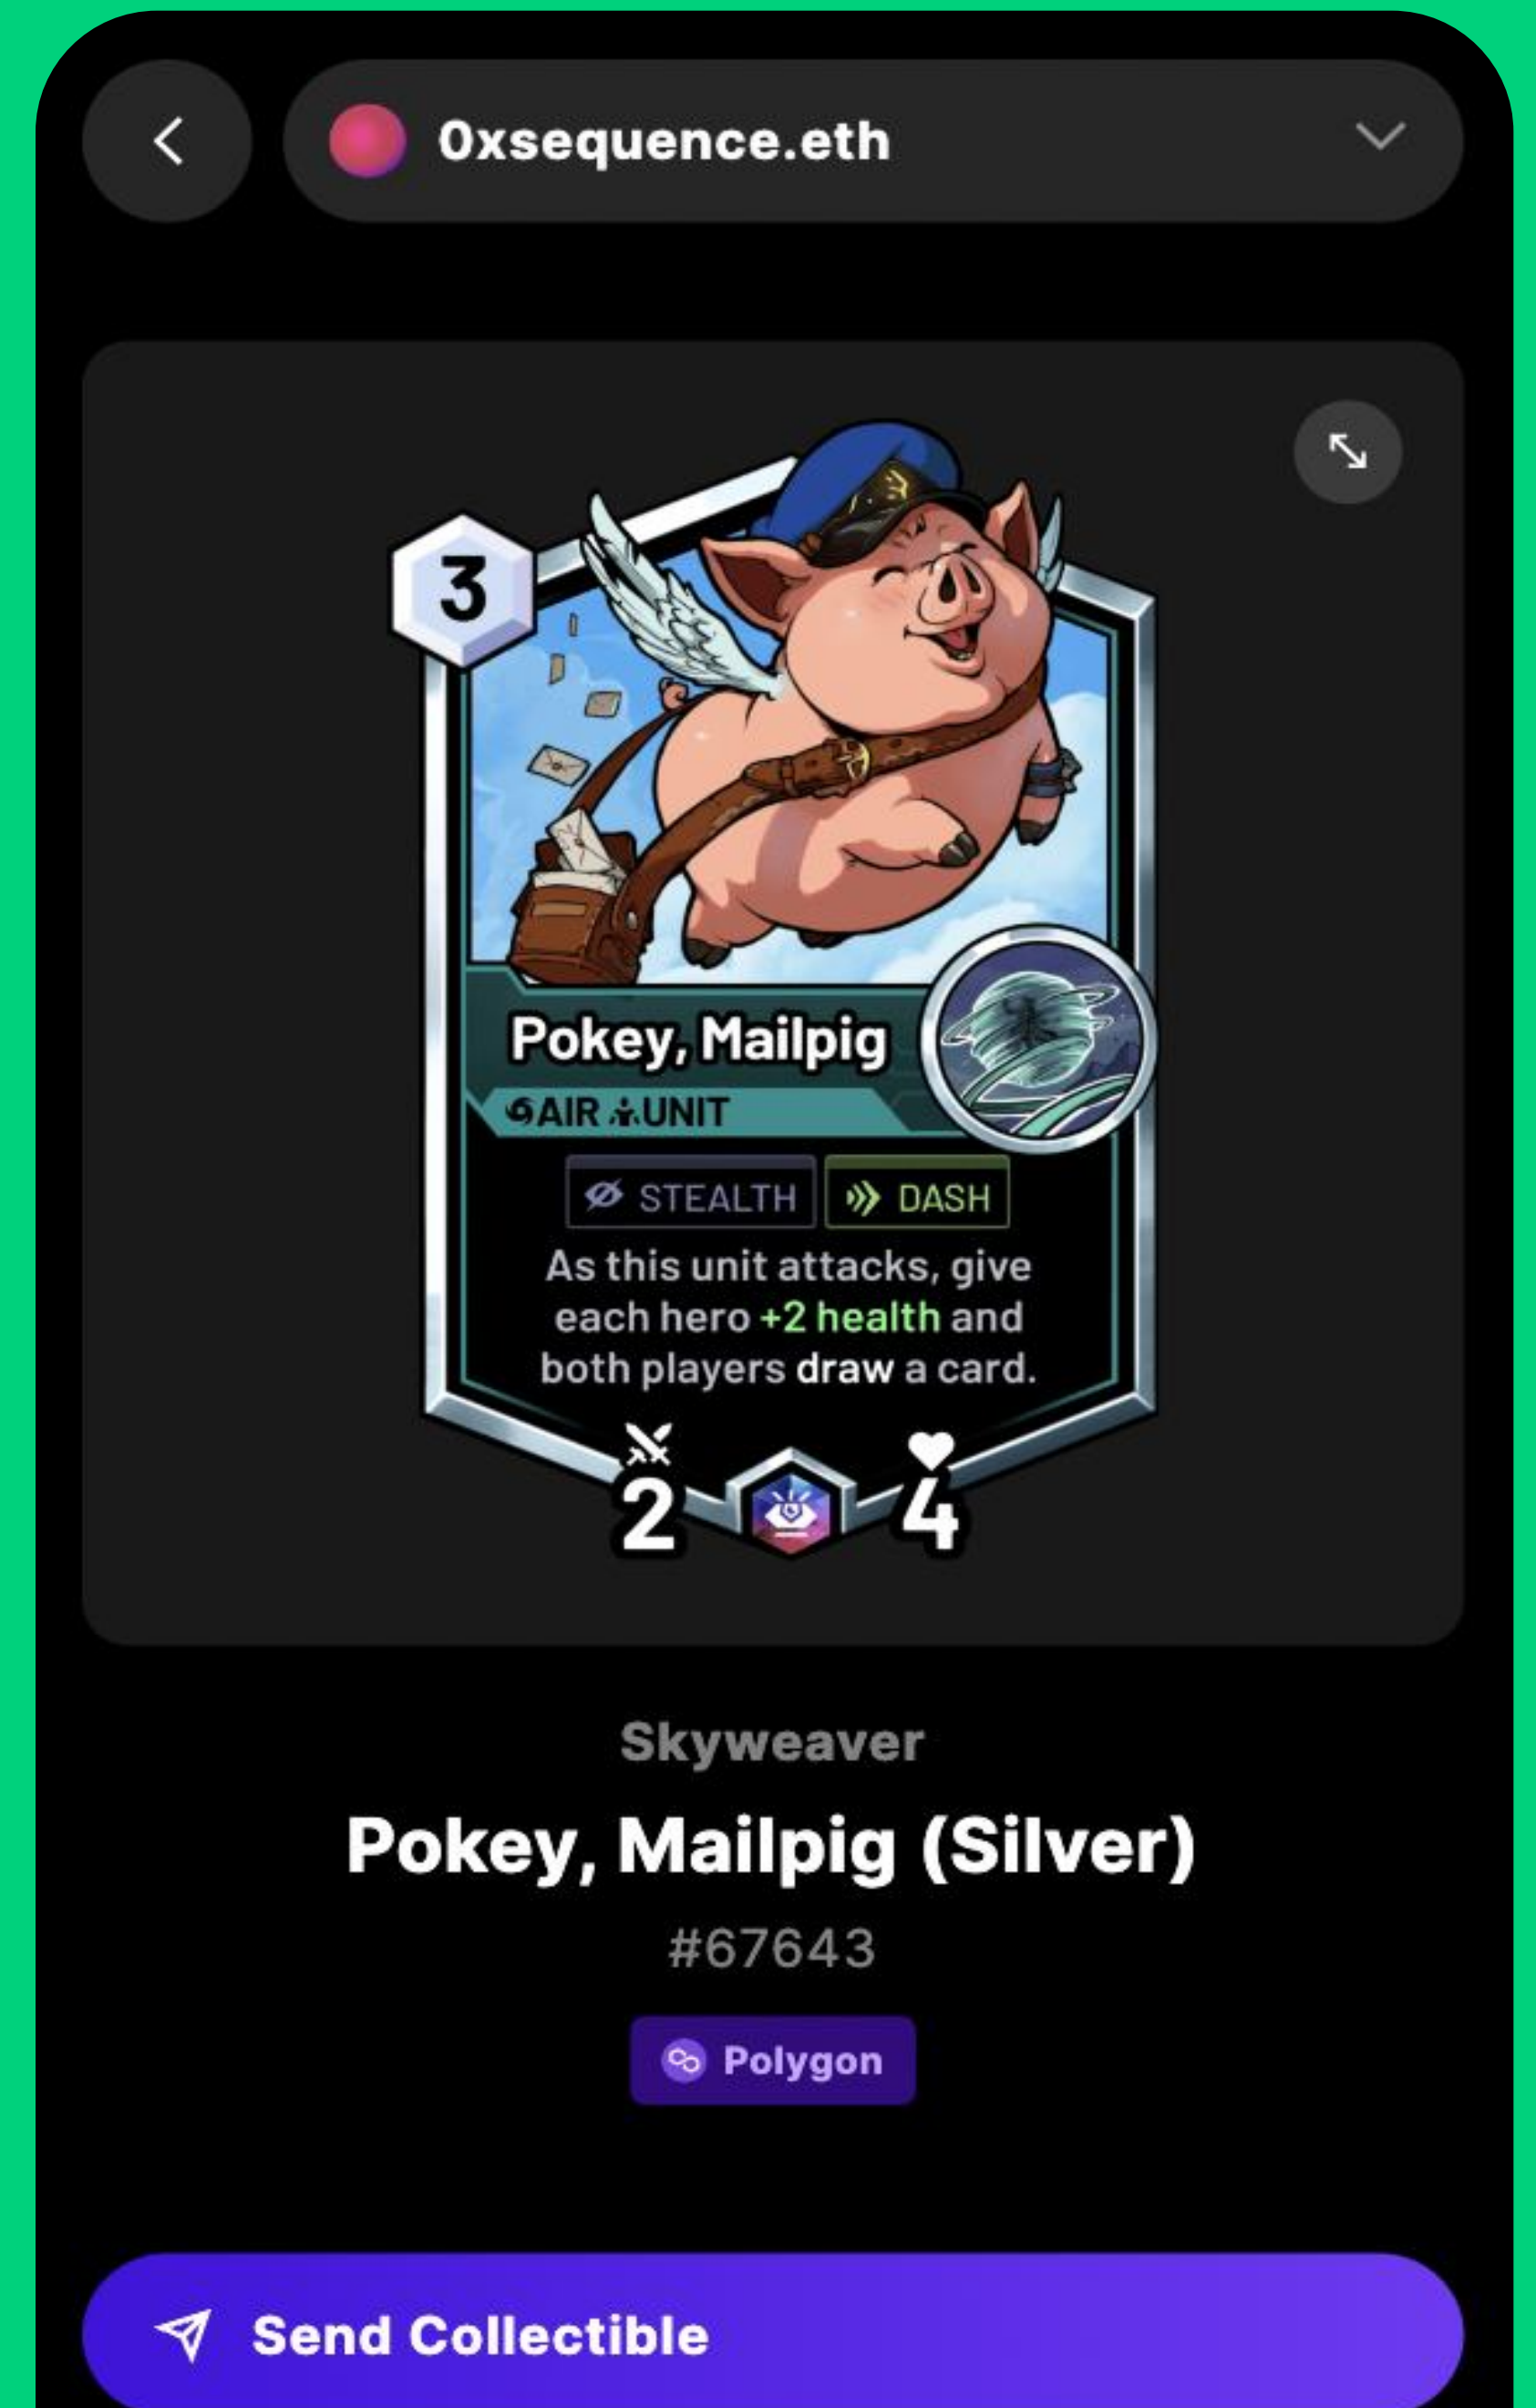

About Sequence

Sequence is the leading all-in-one development platform for integrating web3 into games.

Onboard, monetize, grow, and retain players with Sequence's award-winning technology.

From collectibles and ownable rewards to fully on-chain experiences, Sequence's easy-to-integrate platform solves blockchain complexities, so developers can focus on creative execution and delivering amazing player experiences. Trusted by hundreds of games and thousands of developers. Sequence is backed by Take-Two Interactive, Ubisoft, Xsolla, Bitkraft, Brevan Howard, Coinbase, Polygon, and more.

Visit Sequence

The screenshot shows a mobile application interface for 'Oxsequence.eth'. At the top, there is a navigation bar with a back arrow, the profile name 'Oxsequence.eth', and a dropdown arrow. Below this is a large card for a collectible named 'Pokey, Mailpig'. The card features a cartoon pig character wearing a blue pilot's cap and goggles, flying through the air with a brown messenger bag. The card has a '3' in a white hexagon in the top left corner. Below the character, the name 'Pokey, Mailpig' is written in white, followed by 'AIR UNIT' in a smaller font. Two abilities are listed: 'STEALTH' (represented by a blue eye icon) and 'DASH' (represented by a blue arrow icon). Below the abilities, the text reads: 'As this unit attacks, give each hero +2 health and both players draw a card.' At the bottom of the card, there are three icons: a sword with the number '2', a shield with a red eye icon, and a heart with the number '4'. Below the card, the name 'Skyweaver' is displayed in a smaller font. Underneath that, the name 'Pokey, Mailpig (Silver)' is shown in a larger font, followed by the ID '#67643'. A purple button with the Polygon logo and the text 'Polygon' is located below the ID. At the bottom of the screen, there is a large purple button with a white right-pointing arrow and the text 'Send Collectible'.

Vision and mission

We make web3 easy, fun, and accessible for players and builders to drive the adoption of web3 and its open, transparent, and symbiotic economies.

Our mission is to unlock web3's utility and accelerate content creation by empowering builders to create amazing web3 games and experiences.

Product fact sheet

Sequence is the leading platform developers use to integrate web3 into games.

Sequence Builder

The most complete web3 development stack

Wallet Solutions

Seamless smart contract wallet solutions

Node Gateway

Reliable real-time node service with 99.9% uptime

Payments

Accept any payment method for items + NFT sales

Marketplaces

Launch custom marketplaces in minutes

Transaction API

Efficient on-chain transactions

Collections

Easily create and manage NFT collections

Game Analytics

Monitor your game's growth, analyze player behaviour

Unity SDK

Integrate Unity with web3

Unreal Engine SDK

Integrate Unreal Engine with web3

Mobile SDK

Bring web3 into any mobile app or game

Gas Sponsorship

Sponsor on-chain transactions for your players

Minter

Launch and manage your collections and items

Indexer

Artwork, metadata, indexing

Sequence Builder

Build web3 games with ease. Sequence Builder is a powerful and seamless web3 developer console with plug-and-play tools. Everything you need. Infinitely scalable.

Create marketplaces

Customize and launch in-game marketplaces in minutes

Deploy + manage smart contracts

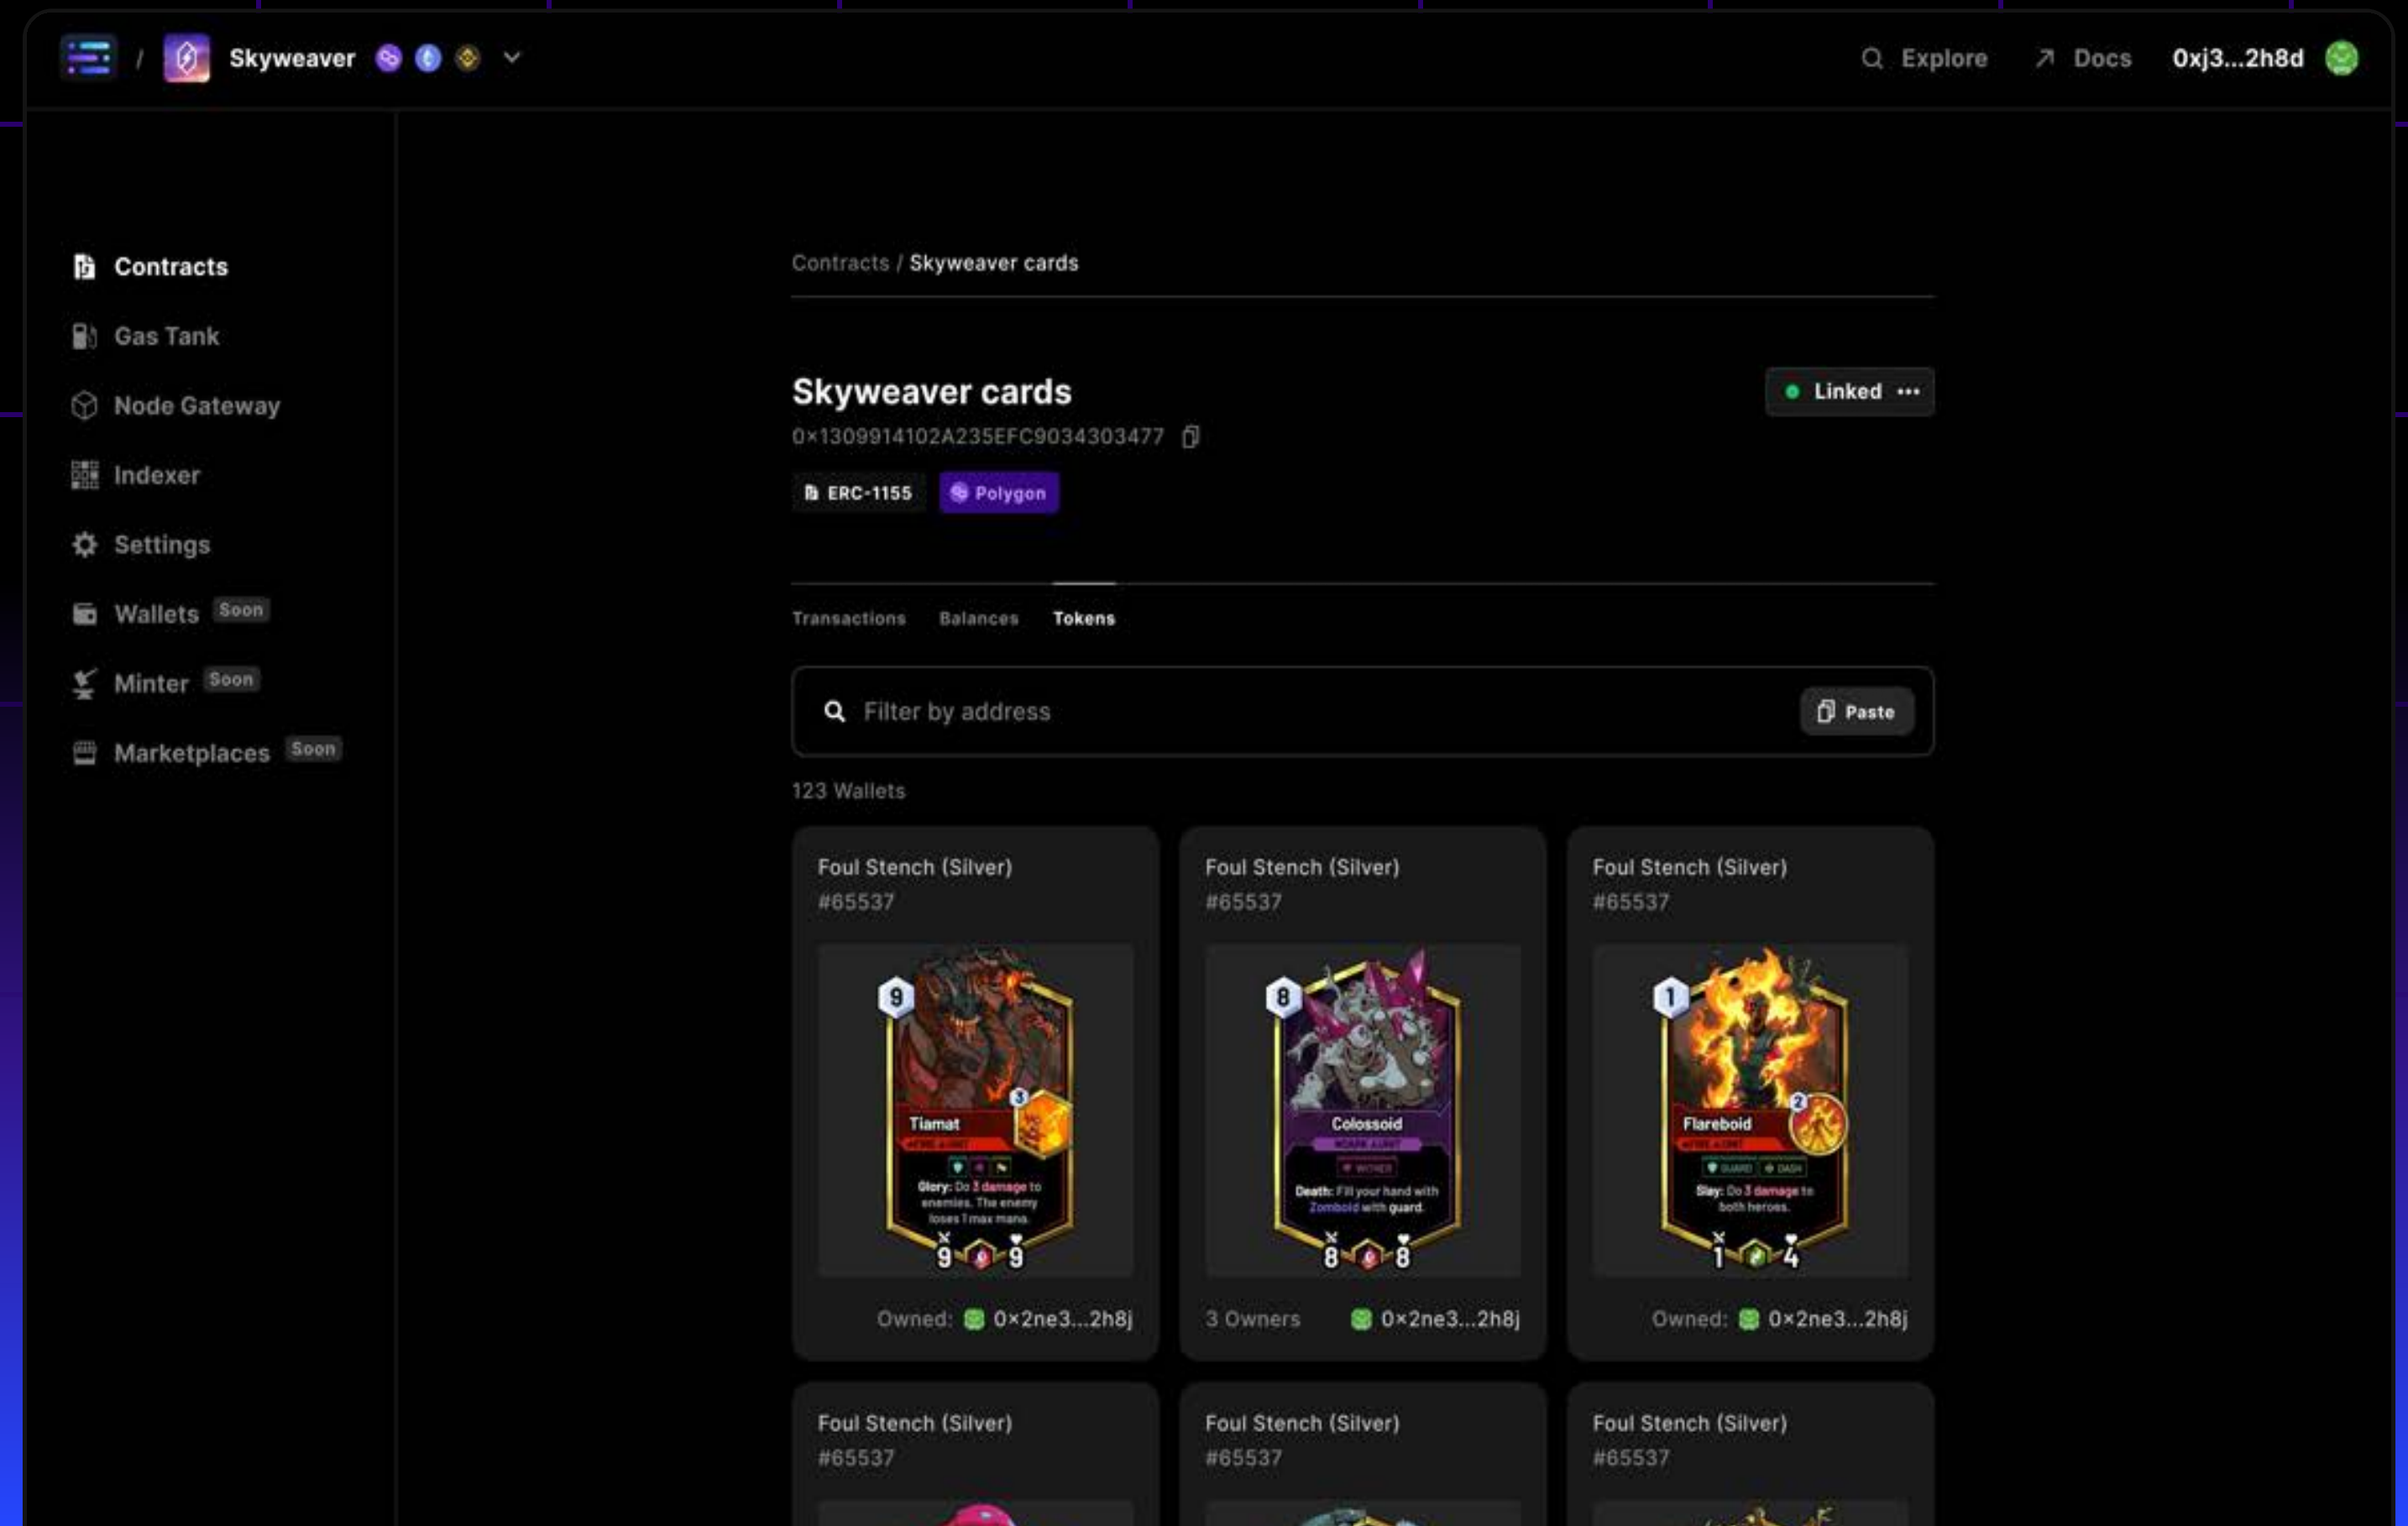

Create and manage any EVM contract, with pre-audited options for 721s and 1155s

Seamless payments

Make payments easy with fiat, crypto, credit, and debit card solutions

Collaborate and elevate

Invite your team to collaborate with our plug-and-play applications

Sequence wallet solutions

Wallet options for seamless player accounts, onboarding, and payments.

Embedded Wallet

The most customizable and seamless wallet solution for player onboarding.

CONFIRM PURCHASE?

Subtotal \$0.00
Fees \$0.00
TOTAL (7 ITEMS): \$0.00

 PAY \$0.00

 PAY \$0.00

All transactions are final ⓘ

Sequence Kit

Onboard web2 and web3 players with the world's best wallet connector.

Embedded NFT checkout

Embedded collections views for all wallets

Embedded new user wallet creation

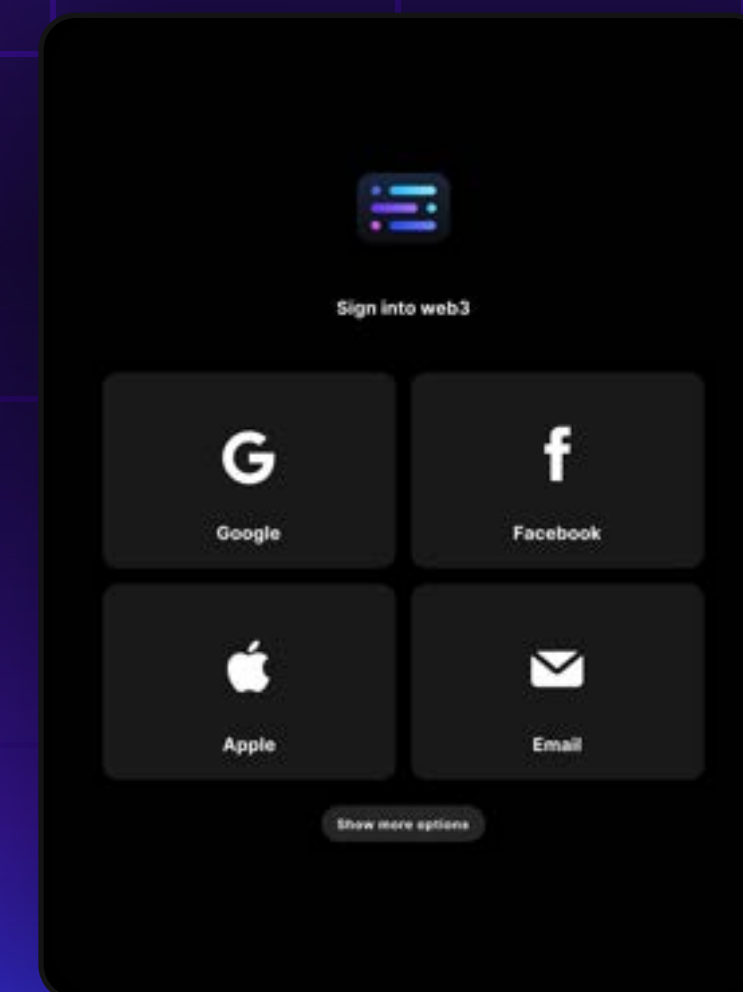

Existing wallet holder connection

Universal Wallet

The market leader in account abstraction and seamless two-click wallet creation.

Testimonials

“If you talk about all web3 app infrastructure and app development teams, Sequence is #1. Their products are the best out there. They understand UX and they understand building high-quality infra tech that serves today’s requirements and future needs for applications.”

— Sandeep Nailwal, Co-Founder at Polygon

“We leverage Sequence to make our web3 game accessible for anyone. We looked at other solutions, and no one else has the same depth and quality as Sequence.”

— Steve Woody, Partner at Sunflower Land
